Full-stack software developer brimming with ideas and an eagerness to make a significant contribution to the world through code. After graduating from LaunchCode's LC101 program and rekindling a long-lost passion, I am eager to share my unique brand of problem solving with a team of individuals who are looking for an ambitious, enthusiastic addition.

LANGUAGES

- HTML5 / CSS3
- Java
- Python
- JavaScript

FRAMEWORKS

- Spring Boot
- Flask

DATABASES

- MySQL
- Hibernate

TOOLS

- Adobe Suite
- IntelliJ
- Visual Studio Code
- Bootstrap

PROJECT EXPERIENCE

CHEESE-MVC-PERSISTENT
https://github.com/bonniewhy/cheese-mvc-persistent

Culmination of all LC101 concepts, and Java skills learned in Unit 3.
- Learned and implemented databases with many-to-many and one-to-many relationships.
- Java, Spring Boot, Gradle, Thymeleaf, Hibernate, MySQL, and Bootstrap.

BLOGZ
https://github.com/bonniewhy/blogz

LC101 assignment in which users can sign up, create, and read blog posts.
- Learned a lot about validation, annotations, sessions, and security.
- Python, Flask, SQLAlchemy, Jinja2, MySQL, and Bootstrap.

THE CHORE WHEEL
https://github.com/bonniewhy/the-chore-wheel

Full-stack, from scratch project where users can log onto a home page and spin a wheel to get a chore to complete for the day.
- Learned Javascript, CSS animations, responsive design principles, and Spring Security to complete this project.
- Java, Spring Boot, Gradle, Thymeleaf, Hibernate, MySQL, jQuery, Javascript, Spring Security.

EDUCATION

LAUNCHCODE'S LC101

Founded on a belief that everyone should have an opportunity to pursue a career in tech, LaunchCode was founded in 2013 to help companies find skilled, driven, new tech talent from all backgrounds and walks of life. LC101 is a curriculum to provide passionate learners with world-class resources to put them on the path to obtaining a job in tech. It spans over the course of 20 weeks, meeting twice a week for 3-hour sessions.

- Learned Java, Python, Spring Boot, Flask, Jinja2, Thymeleaf, MySQL, Hibernate, and a whole slew of object-oriented programming concepts.

WORK EXPERIENCE

SERVER, *Brown & Loe*
Kansas City, MO | July 2016 - Present

Officially opened on August 2, 2016, we had the soft opening of the restaurant on my thirtieth birthday, and I've been there ever since. Family owned and operated, I am honored to be a part of the Murphy's restaurant legacy.

- Quickly, and efficiently taking guests' orders, timing their courses, delivering food, and creating an atmosphere to ensure an amazing experience that will enhance the guests' day.
- Always learning new information about various specialty food, wine and spirits.
- Enthusiastically paint a beautiful, mental picture of the daily specials to entice our guests to get them.

CONTRACTOR, *PEL Athletics c/o Odd Fox, Inc.*
Kansas City, MO | November 2015 - March 2017

Working this contract work allowed me to jump head first into a program I had been desiring to learn for many years. It was really fun to see how apparel design works from the inside out.

- Quality checked Illustrator files meant to be printed on apparel items for various high schools around the country.
- Fixed computer-made mistakes and repositioned elements so it would print properly on the clothes with the software being used.
- Had to self-start and keep myself focused to meet strict, immovable deadlines.

FREELANCER, *Self-employed*
Kansas City, MO | 2013 - Present

Although I haven't been actively seeking freelance jobs for a couple of years, the two clients I have completed projects for are happy, and I still maintain their sites to this day.

- Conceptualized, designed, and coded gallery sites for my two amazing artist clients in jQuery, HTML, & CSS.
- Maintained the sites by updating and adding pictures and resume information for both of them.
- Hoping to put my new found coding knowledge to good use to make each website easier for my clients to update without my assistance.
